

# ResearchHub Endowments

Turn the \$RSC in your ResearchHub account into a perpetual science funding machine

**TL;Dr** - Hold ResearchCoin (\$RSC) in your ResearchHub account and automatically earn ~5-25% yearly returns in funding credits. Use these credits to fund preregistered research proposals.

## How It Works

01

### Hold ResearchCoin

Deposit newly purchased \$RSC into your ResearchHub account.

02

### Earn Credits Automatically

The \$RSC you hold earns yield funded via protocol inflation.

03

### Fund Science

Donate the funding credits you earned & earn a tax break.

## Self-Balancing Yield

Funding credit yield is dynamic over time. Initially less RSC will be staked, so the yield will be higher. As more RSC is deposited into ResearchHub the yield decreases, until it stabilizes at a rate the market considers fair.

Participation % of supply staked	Year 1	Year 10
15%	~47% yield	~27% yield
<b>30%</b>	<b>~24% yield</b>	<b>~13% yield</b>
70%	~10% yield	~6% yield

Bonus: **Yield increases for users who hold their \$RSC in ResearchHub for longer periods of time.**

### Example: \$1M of Research Funding

Traditional grant: You give \$1M once. It funds research. Then it's gone.

#### ResearchHub Endowment:

1. Deposit \$1M in ResearchCoin
2. Year 1: Fund ~\$236K of research
3. Year 10: Funded ~\$1.8M total
4. Principal: Still yours

**One-time capital → Perpetual funding**

ResearchHub has previously funded scientists from:
